HIQ

Ambient Assisted Living

With the help of HIQ solutions we create Ambient Assisted Living (AAL), which helps to live better, support care and specific services and provide valuable data and alerts to caregivers.

Changes in routine may indicate changes in human health. HIQ home automation makes homes more comfortable, safe and manageable also for healthy people and patient and at the same time provides date, which may indicate changes in routine, which may be valuable in generating early warnings in healthy people or indicate changes in patients
